

Skin Crawl

Serena Ryder

you make my skin crawl further than ever before
my bones maybe be naked
now but at least your not passed out on my floor

i watched you sneak away under my skin
i watched you finish where i began
i watched you sneak away under my skin
i watched you finish where i began

don't you know theres no such thing as people anymore?
one rolled over and one fell out
ones passed out on my floor

don't care what they eat cause everything tastes the same
we've all memorized their only set of rules to the same stupid
fucking game

i watched you sneek away under my skin
i watched you finish where i began
i watched you sneek away under my skin
i watch finish where i began
finish where i began
finish where i began
were i

you make my skin crawl further than ever before
my bones maybe naked now but at least your not passed out on my
floor
i watched you sneak away under my skin
i watched you finish where i began
i watched you sneak away under my skin
i watched you finish where i began
i watched you sneek away under my skin
i watched you finish where i began
i watched you sneek away under my skin
i watched you finish were i began
