

Serenade of Flames

Serenity

I'm glad we're talking face to face you know I've got a job to do and I expect some help from you, too Soon you'll call them in to torture me why do you need this privacy? You'll have your horrid joy anyway

One more night and then in flames you'll die nothing you can do or say could change your fate You are mine! One more night and then in flames you'll die We invented Lucifer to spread the fear across the nations

I can't negate the evidence they say you've healed a little girl with guidance from another world Then a good deed, now my last mistake You tell me my reward's the stake is this the Christian duty you preach?

You've been caught in our system of power and fear We will break your resistance, your confession is near

Malleus Maleficarum (4x)

Don't you think God is watching? Your carnival of lies won't last eternally Trust my words, if he's watching he has never showed and he won't take your soul ...

One more night and then in flames I'll die nothing you can do or say could change your fate You are mine! One more night and then in flames you'll die We invented Lucifer to spread the fear across the nations One more night and then in flames you'll die We invented Lucifer to spread the fear Across the nations
