## **Pretty World**

## **Sérgio Mendes**

Why don't we take a little piece of summer sky Hang it on a tree For that's the way to start to make a pretty world For you and for me And for the sun we'll take a lemon bright balloon You can hold the string Oh can't you see that little world of ours will be The prettiest thing We can gather rain enough for the stream To hold our happy faces When we want a breeze, I'll blow you a kiss or two Take me in your arms and our little world Will be the place of places Nothing left to make but breakfast and love We'll hang a little sign that just says Paradise Population two For that's the way to start to make a pretty world For me and for you For you It's what I wanted to do, to do To make a world
