I can feel you far away, your hesitation matching mine. Sadness left me far away yea, Your contemplation turn to wine An old man stares at me In mutual bizarre reverie

Laugh at thy neighbor Pretend you are sane, just the same You survived in vain

Laugh at thy neighbor Pretend you are sane, just the same You survived in vain

Time is the father of existence Rhyme, the brother of resistance Broken down by men in their crazy mind

Void is the mother of unknown distance Will, the sister of persistence Stripping under the elusive sky

The potion of devotion Euphoric scriptures of the ocean

Laugh at they neighbour Pretend you are sane just the same You survived in vain

Time is the father of existence Rhyme, brother of resistance Broken down by men in their crazy mind

Void is the mother of unknown distance Will, the sister of persistence Stripping under the elusive sky

I felt so alone
'Til you came into my life
And stopped the pain
I felt so alone then you came into my life
And poured the rain
I feel so alone dressed in the dark silk clothing of your own distain
I feel so disowned since your children took our arms in your own name.

God name's different in every language God name's different in every language

Bombs envision compulsive solution Gods speak different in every language. Bombs envision compulsive solution God speaks different in every language.
