

## Feed Us

Serj Tankian

Maybe we believe  
she was ready to go  
In the morning light  
Maybe you believe  
That she was made of gold  
In the east where you killed her  
You lead us  
When you need to feed us  
You comfortably delete us  
When you need your fetus,

You cheat us when you feed us with the lie,  
Stars look out and,  
Cheat us when you feed us with the lie,  
Stars look out,

Goodbye, goodbye,

She speaks unrehearsed  
Languages from skin  
In the morning light  
Painting shadows on the  
faces of the dead  
In front of their widows,

You cheat us when you feed us with the lie,  
Stars look out and,  
Cheat us when you feed us with the lie,  
Before its too late,

Do you know that life is ending,  
As we go, the dots connecting,  
We had our chance to save the garden,  
As it dies, our souls will harden,  
With these words chastising your conscience  
Were breaking through and praying for  
transcendence.

But you deceived us all now,

You cheat us when you feed us with the lie,  
Stars look out and,  
Cheat us when you feed us with the lie,  
Stars look out,  
Cheat us when you feed us with the lie,  
Stars look out and,  
Cheat us when you feed us with the lie,  
Stars look out.
