

Bad Guy

Set It Off

I spend the night, yeah, doing ninety in a fifty five
Ignore the lights til I'm on your side
Because when you take this out on me my weakness
We are the heart of kryptonite

I stole the moon
I made the stars align
And I showed you how to fly
And you made me the bad guy

You paint the scene, with the colors of an enemy
All over me, and for your friends to see
I'll do just what you said
And now I'm hanging by my feet
Out of sight and out of reach

I stole the moon
I made the stars align
I showed you how to fly
And you made me the bad guy
I fought for you
I kept you safe at night
I would have risked my life
And you made me the bad guy

You made me the bad guy
You made me the bad guy
Yeah, you made me the bad guy

Guess I forgot, guess I forgot
What's lost is found, what's lost is found
It's so hard to see
Just show me how, just show me how the... with me

And I stole the moon
I made the stars align
I showed you how to fly
And you made me the bad guy
When I fought for you
I kept you safe at night
I would have risked my life
And you made me the bad guy
