

# Kill The Lights

Set It Off

You reside in grand disguises  
Just to get, get away from it all  
Falsify the life you're hiding  
Just to get, get away from it all  
But the truth we pursue as we all beg you to

Kill the lights, kill the actor, kill the actress  
I'm afraid that the spotlight dried you up, whoa, whoa oh

Shut your mouth, you make me sick with  
All the lies, all the lies that you spill  
Slip and fall, I'll watch you drown in  
All the lies, all the lies that you spill

As you're tongue-tied, did you believed it?  
False pride never existed  
Now I am cutting ties clean off  
And I can breathe at last

So we all stand enthralled by this bland curtain call  
And the truth we pursue as we all, we all beg you to

Kill the lights, kill the actor, kill the actress  
I'm afraid that the spotlight dried you up, whoa, whoa oh

Don't even think about it  
Don't even think about it, no  
We're begging you  
To kill the lights, kill the actor, kill the actress  
Or kill us all

Stop there and peer inside of me  
You'll find a man once lost at sea  
But all the while I would think to myself  
It's not the end, it's not the end at all

So sick of nothing going right  
Sail on along into the night  
Not even death could stand in the way  
You never even tried in the first place

Kill the lights, kill the actor, kill the actress  
I'm afraid that the spotlight dried you up, whoa, whoa oh

Don't even think about it  
Don't even think about it, no  
We're begging you  
To kill the lights, kill the actor, kill the actress  
Or kill us all  
Or kill us all  
Or kill us all
