## **Celestial Remains of the Cosmic Creation**

## Setherial

A long journey Through hostile clouds Of poisonous dust and killing plasma To reach the nebula of the ancient essence And comprehend the dogma of the pillars of creation

Gathering particles generating greater masses Attracting more matter to conquer the stellar might

Matter D Antimatter Opposites attracted towards a destructive end Electric paths leading to The balance of the equation

The path of destruction Is taken with an inborn cynical instinct

Attracting light to darkness To generate a new breed

Creation D Anti-creation Opposites attracted towards a destructive end Electric paths leading to The balance of the equation

For darkness is life And light is only a seed of insanity Now dry and empty In the dimension of opposites

From the surface of the nebula That drains life's blood In the system that no divine light can reach

Twisted cosmic journeys Leaving traces in time and space Twisting and turning on themselves To reveal the gate to the unlight world

To reveal the gate to the unlight world

For darkness is life A new state of self And light is only a seed of insanity Drawing new lifeblood from celestial remains In the dimension of opposites

Obsolete ways now forgotten and useless As a convey of wisdom New state of the self Pure energy As a convey of wisdom
