

# Symphony Of Stars

## Seven Kingdoms

I only dream because  
I did not know  
It could be real  
The lie that says "I can't"  
But my heart is my shield  
Looking above to see  
The stars of my heavens  
I made a wish to hold  
The universe in my hands

By the sun  
Clouds ignite  
In this darkness be my light  
All will be  
Turned to dust  
Here in the winds of the night  
In the sky,  
Crystallized  
We will collide  
You and I

Look into the glass  
Can't you see, there is no agony  
We are forever among  
The symphony of stars  
This is my little piece of space  
This is my symphony of stars

One day we will be gone  
But our voice immortal, lies in song  
To the skies from earth  
This will be our triumphant rebirth  
Soar now past Orion  
Beyond the darkest parts of space  
Where am I? What have I done?  
Where is this place?
