

Talk To Me

Seven Wiser

How can you live with yourself
After everything you did to me?
And now you sit and cry a million tears
Sipping your alcohol, thinking of yourself
And how the world around is gone
And I know there's something wrong

Is there something on your mind?
Is there something wrong with me?
If there's something you can talk to me

I see it in your eyes
I've seen it every day
I did everything I could for you
But then you looked away,
And kept it all inside
You let the world around just fade
And I know there's something wrong

Is there something on your mind?
Is there something wrong with me?
If there's something you can talk to me
