

## Talk To Me

Seven Wiser

How can you live with yourself  
After everything you did to me?  
And now you sit and cry a million tears  
Sipping your alcohol, thinking of yourself  
And how the world around is gone  
And I know there's something wrong

Is there something on your mind?  
Is there something wrong with me?  
If there's something you can talk to me

I see it in your eyes  
I've seen it every day  
I did everything I could for you  
But then you looked away,  
And kept it all inside  
You let the world around just fade  
And I know there's something wrong

Is there something on your mind?  
Is there something wrong with me?  
If there's something you can talk to me
