

We've seen the miles
We drank the moon
We choose the sides
And judge the fools

What's the matter, did the silence find you?
How's it to feel to see the one thing you don't need?
Come around come around this way

I won't defend
You won't surrender
How long do we go?
A long lost descent
We do it together
How long do we go?
You lead and we'll follow

We're safe and sound
Spoke up way too soon
We can all just close our eyes
And pray to god, we all pull through

What's the matter, did the lights just blind you?
How's it feel to see the one thing we all need?
Come around come around this way

I won't defend
You won't surrender
How long do we go?
A long lost descent
We do it together
How long do we go?
You lead and we'll follow

Surrender and follow
How does it feel to change?
In the darkest of days, we all fall down
One more mistake
The changes seem to fade

I won't defend
You won't surrender
How long do we go?
A long lost descent
We do it together
How long do we go?
You lead and we will follow

I won't defend
You won't surrender
How long do we go?
A long lost descent
We do it together
How long do we go?
You lead and we'll follow
