

Mountain

Sevendust

Under the dark grey sky
Under fist and hate
I break the mold of the villain
Choke the love you crave
You better believe they're
Taking me alive flesh and veins
So that the whole damn world
Wants to scream my name

First on top of the mountain
Push back, drop down
Broke you to pieces
I'm on top of the mountain
Save name, save face
Keeps all of me away from you
It keeps me away from you

So when the cut burns deep
And your mouth runs out
The path you treading along
Keeps your head in the clouds
You better believe
I'll begin
You better believe
Where you end
And now the whole damn world
Sees the threat I am

First on top of the mountain
Push back, drop down
Broke you to pieces
I'm on top of the mountain
Save name, save face
Keeps all of me away from you
First on top of the mountain
Push back, drop down
Broke you to pieces
I'm on top of the mountain
Save name, save face
Keeps all of me away from you

Keeps me away from you

First on top of the mountain
Push back, drop down
Broke you to pieces
I'm on top of the mountain
Save name, save face
Keeps all of me away from you
First on top of the mountain
Push back, drop down
Broke you to pieces
I'm on top of the mountain
Save name, save face
Keeps all of me away from you

Keeps me away from you
