

Murder Bar

Sevendust

Scrape that blood off your face
Life's ripping away your failing system
Way too many searching for the quick fix
Oh life is perfect
When the thieves become desperate all around

You can't see in my world no more

Hit the daybreak
Watch your life melt away
(Watch it melt away)
Blistered and burned
Nothing's gonna be the same

Run now from the void you create
From the world that you
Blame for your existence
No one here will help
In the deep fix
And you think life is perfect
When the secrets are buried underground

You can't see in my world no more

Hit the daybreak
Watch your life melt away
(Watch it melt away)
Blistered and burned
Nothing's gonna be the same
(Come on, come on, lie again
Just lie to my face again)

You speak no more
(Eliminate!)
I see it coming
(Dead world!)
Your hate, I kill the solace
(You say!) No more

Hit the daybreak
Watch your life melt away
(Watch it melt away)
Blistered and burned
Nothing's gonna be the same
(Come on, come on, lie again
Just lie to my face again)
