## **Taint The Sky**

## **Seventh Wonder**

A Northern corner The stage is set and each must play his part Accusing children: "I have seen her fly!" -- the life-depriving lies

I'm sorry you must believe me But we have seen you heal in evil ways Deceiver!

Witches will burn Even if she dies for a crime unknown Taint the sky, ashes falling And even if your heart is saying No Your mind is so twisted Can you really let her go? Soon the heavens will burn

A stronger magic To allow this jest reason is subdued Accused and lying Oh sure she will cry Confession tears they are

I'm sorry, my life is over And we will make the demons go away Forever! Witches will burn Even if she dies for a crime unknown

Taint the sky, ashes falling And even if your heart is saying No Your mind is so twisted Can you really let her go? Soon the heavens will burn

A kingdom is burning And will I ever know just why? I see them burning on I see It burns in me They're burning us all

Witches will burn Even if she died for a crime unknown Tainted sky, shame is calling And even if your heart is saying No You can make a difference Can I really? Yes, I know Soon the sky in the fire will burn
