

Present Situation

Sevyn Streeter

With every breath in my lungs, I'm gone
Scream out my mind 'cause I miss you so
But eventually, I get over you
Hit up the mall and drop a couple bands off
Spending money is my antidote, yeah
Don't that sound like somebody you know? Yeah
She hurt you, you hurt me
But without her, we wouldn't be
So I don't know what to say right now
And I don't know where to be right now

How do I address the present situation?
The present situation
The present situation
I don't know how to address the present situation
The present situation

So when you started out tricking on me
You was trying to get over her
And when you started to lay me down
You was still getting over her
I wonder if you love me now
Or if you ever loved me at all
A baseless love and still we fall
And I'mma tell myself that every nigga seem irrelevant
(Just sex me right)
I'mma keep on showing it so much that I start to forget
(I love the light)
And I gotta acquire your taste
Swallowing straight with no chase
(This ain't right)
Then I start to come around
That's the Sevyn they heard about
But then you have to hold me down

I got a present situation
Oh, present situation
We gotta address the present situation
I don't know how to address the present situation
The present situation

And I can't lie, I love it
I can't lie, I love it
It ain't right, I love it
I wouldn't have chose this life, but I love it

The present situation
The present situation
The present situation
I don't know how to address the present situation
The present situation
