

Heal Me Kill Me

Shaka Ponk

I'm not here to last and live alone
Heal me or kill me, it's your call

You're a natural born decida
So heal me or kill me, after call

We don't need to argue again
We are not gonna shake hands

If it's not love and we re not sure, let's get it down

Even if u wanna hide your voice
Heal me or kill me, make a choice

It's up to ya baby, it's up to you to
Feel me... Feed me or take of

We don't need to make love again
We re not gonna be just friends

If it's not love and we're not bound, just put me down

May be somewhere other places and faces
May be later someone will find my pieces
Just let me out or put me down

Life has just a funny way to make u hope for better
Kiss me and kick me... Out, whatever

Just a funny way to plan the best for later
Maybe... Maybe ... For later...

We don't need to pretend again
We are not gonna win that game

If it's not love and we're not sure, let's get it down
If it's not love and we're not bound, please put me down
