

What We Said

Shakira

I'm leaving with a broken heart
I never meant to do you harm
Don't ever want to see you cry, again
And everybody hurts sometimes
I never meant to do you wrong
I know you're gonna be just fine, he said

I wish we could go back in time
See the world with different eyes
Knowing what we both know now
Could have made it work somehow

But we said, what we say
And what we made we can't unmake
And what we give is what we get
And this is what we're stuck with now
But we said, whatever that we said
And what we made we know we can't unmake
And what we get is only what we gave
And this is what we're stuck with now

I'm leaving with a broken heart
I never meant to do you harm
Don't ever want to see you cry, again
But everybody hurts sometimes
I never meant to do you wrong
I know you're gonna be just fine, he said

I wish we could go back in time
Find a road that doesn't wind
Right now, darling, we would be
Beautiful like harmony

But we said, what we said
And what we made we can't unmake
And what we give is what we get
And this is what we're stuck with now
But we said, whatever that we said
And what we made we know we can't unmake
And what we get is only what we gave
And this is what we're stuck with now

I'm leaving with a broken heart
I never meant to do you harm
Don't ever want to see you cry, again
But everybody hurts sometimes
I never meant to do you wrong
I know you're gonna be just fine, he said

Do you remember how you used to get lost in my eyes
(I remember, darling)
Do you remember how you promised you'd never say goodbye?
I remember, I remember, I remember...

But we said what we said
And what we made we can't unmake
And what we give is only what we get

And this is what we're stuck with now

I'm leaving with a broken heart
I never meant to do you harm
Don't ever want to see you cry, again
But everybody hurts sometimes
I never meant to do you wrong
I know you're gonna be just fine, he said
Again
