

Lonesomeness

Shakra

I remember it clearly when we met the first time
And your smile has been tempting
You've taken my breath
But it's become colder our love on the edge
And the world treats me badly a bittersweet taste

I'm drifting in darkness
And my emptiness' staying
Don't shut me out baby
It's making me ill - it's an overkill

Cannot throw it all away in the blink of an eye
If you left me all alone truly I would just die
Couldn't deal with it and I'd lose myself
I am pleading let's have one more try
I need you

And the way we have split up I can't figure out
Begging for revelation can stand this no more
Memories are painful like a shot through the heart

I'm drifting in darkness
And my emptiness' staying
Don't shut me out baby
It's making me ill - it's an overkill

Cannot throw it all away in the blink of an eye
If you left me all alone truly I would just die
Couldn't deal with it and I'd lose myself
I am pleading let's have one more try
