They all say just toe the line Don't make any noise Be like dad and you'll be fine You don't have no choice

It's my life and I'll decide
Where I'm going now
Find my way through wrong or right
That's what it's all about
What it's all about

Make your mind up and be there And do it better Hold your head high in the air It's now or never

Things get hard and life is tough Gotta do what's right Even when the seas are rough And days turn into night

Don't believe what people say Listen to your heart It'll light the darkest way That'll be the start, What a way to start!

Make your mind up and declare
I'll do it better
Hold your head high in the air
It's now or never
