

Right Here

Shalamar

Right here
Right here

All the guys that look her way
Cause she's got what it takes to make their heads turn
I hope we never get to that jealous stage baby
'Cause to look and not to touch is where I draw the line

You know if I was feeling insecure
Or if I wasn't sure, I would tell you
So baby let good looks that shut your eye
(But while you're looking around)

Don't forget that you've got it - right here
In my loving arms,
Don't you forget that you've got it - right here, baby

I think about different things to keep love alive
I go to work into the spar where I hear oversize
But I wanna keep this body tuned for you baby
So you won't have no excuse to ever stray from home

I appreciate the things you do
I know it's all for us and to keep love new
But if you feel the urge to look around

Don't forget, don't forget that you've got it
Don't forget, don't forget that you've got it

The grass looks greener on the other side
But we've got to understand and keep an open mind
'Cause everything's not what it seems baby
What you've got when you're with me is all you really need

And boy I'll dedicate my life to you
And give you all you need - security
But just be sure you let love be your guide
While you're looking around

Don't forget that we've got it - right here, baby
Can you and I just keep this loving - right here
Remember when they hit on you

Don't forget, don't forget that you've got it (right here)
In my loving arms (oooh-hoo)
Don't forget, don't forget that you've got it (right here)

Save all your charms for me baby
Cause I'm tough, and I'll make my stand for us
