

The apeman died 2001
The ice is melting in the nuclear sun
What a life, what a time to live in
If your not a human being

What you doing, get a life, what you doing
What you doing, get a life, what you doing

They've tagged my body, and bugged my brain
You got the number don't need the name
What a time what a place to live in
If your not a human being

What you doing, get a life, what you doing
What you doing, get a life, what you doing

No I'd never talk to strangers
If I new of all the dangers
But now they've gone and cloned the monkeys
Life ain't gonna be so spunky

The apeman died 2001
The ice is melting in the nuclear sun
What a life, what a time to live in
If your not a human being

What you doing, get a life, what you doing
What you doing, get a life, what you doing
