Before We Say Goodbye

Shannon Noll

Sometimes your heart It feels so far away Sometimes our lives are night and day It always seems there's something out there better Who knows?

Before we say goodbye Take a breath and think about it You're the one who makes me feel Ten stories high I'll survive and stay alive and Take a look down deep inside Before we say goodbye

Sometimes my world I feel it sweep away I hear your name and I feel safe Sometimes we dream of another life we're missing But who knows?

Before we say goodbye Take a breath and think about it You're the one who makes me feel Ten stories high I'll survive and stay alive and But I need to know why Before we say goodbye
