Everything I Wanted

Shannon Noll

The past is history You can't go back and make it alright You never get to choose if you win or lose That's not how it goes,oh no

I know I had it all How much more could anyone have? And now I'm tryin to find what used to be mine Before I went away

Everything I wanted Was everything I left behind I never knew what I'd lose And everything I needed Was standing right in front of me Now I know that it's true Everything I wanted was you

How can I explain Looking back I know I was wrong I just couldn't see the forest for the trees What more can I say

Don't say all our bridges are burned After all the lessons I've learned Is there a chance that you could be mine Or am I wasting my time

Everything I wanted Everything I dreamed about Was everything I aready had

Everything I wanted Was everything I left behind I never knew what I'd lose And everything I wanted Was standing right in front of me Now I know that it's true

Everything I needed And everything I wanted Now I know that it's true Everything I wanted Was you
