

# Lonely

Shannon Noll

Sittin in a hotel miles from nowhere  
Thought that this would be my happiness  
I look at the phone and pick it up  
For the millionth time I put it down again

I know I let you go  
And I've got no right to know

Do you ever get lonely baby  
Don't you ever get tired of living that way  
Don't you ever wonder whether there's a better life,  
out there yeah  
Do you ever think about what we had  
And how you'd give anything to get it back  
Do you ever think you'll never love that way again

Wonder if and only  
Do you ever get lonely

I look around the room and wonder  
When it was and how my life has changed  
I'm surrounded by a million so called friends  
And I don't even know their names

When all of your love is gone  
And you you feel like you don't belong  
Oh tell me

I know that this world has changed us  
Now we're nothing more than strangers  
But do you think about me ever  
Do you think we belong together

Do you ever miss me  
wishing you could kiss me  
If only you could hold me  
Do you ever get lonely  
Like me....
