

Aftertaste

Shawn Mendes

Re-re-rewind that one Friday night
Never forget it
How you let me go
No more lies I'll be fine
I know where I'm headed
Probably should've known
Now you're gonna say
pretty please forgive me
Fooled me once told you twice
you're gonna regret it
Now you're all alone yeah

Turns out that no one can replace me
I'm permanent you can't erase me
All of you remember me
One more kiss is all it takes
I'll leave you with the memory and the aftertaste

Close your eyes
you get high try to forget me
but I'm everywhere
I'm the smell on your sheets
you regretted when you left me there
Now you're gonna say
pretty please forgive me yeah
Bet it hurts it gets worse you know
nobody said it would be fair oh yeah

Turns out that no one can replace me
I'm permanent you can't erase me
All of you remember me
One more kiss is all it takes
I'll leave you with the memory and the aftertaste

And now there's something in your way
Cause you threw it all to waste
And you wonder if you could take back
what you did that day
and it hurts cause

Turns out that no one can replace me
I'm permanent you can't erase me
All of you remember me
One more kiss is all it takes
I'll leave you with the memory and the aftertaste

Truth is that no one can replace me
I'm permanent you can't erase me
All of you remember me
One more kiss is all it takes
I'll leave you with the memory and the aftertaste
I'll leave you with the memory and the aftertaste
