Aftertaste

Shawn Mendes

Re-re-rewind that one Friday night Never forget it How you let me go No more lies I'll be fine I know where I'm headed Probably should've known Now you're gonna say pretty please forgive me Fooled me once told you twice you're gonna regret it Now you're all alone yeah

Turns out that no one can replace me I'm permanent you can't erase me All of you remember me One more kiss is all it takes I'll leave you with the memory and the aftertaste

Close your eyes you get high try to forget me but I'm everywhere I'm the smell on your sheets you regretted when you left me there Now you're gonna say pretty please forgive me yeah Bet it hurts it gets worse you know nobody said it would be fair oh yeah

Turns out that no one can replace me I'm permanent you can't erase me All of you remember me One more kiss is all it takes I'll leave you with the memory and the aftertaste

And now there's something in your way Cause you threw it all to waste And you wonder if you could take back what you did that day and it hurts cause

Turns out that no one can replace me I'm permanent you can't erase me All of you remember me One more kiss is all it takes I'll leave you with the memory and the aftertaste

Truth is that no one can replace me I'm permanent you can't erase me All of you remember me One more kiss is all it takes I'll leave you with the memory and the aftertaste I'll leave you with the memory and the aftertaste
