On Standby

Shed Seven

Would you stay on standby? Because I need another alibi In the wrong place at the wrong time

Could you talk a fine line? I need to know that I'll be fine Bulletproof

It's like I've never been born We conceive in the alleyways It's like I've never been born

We believe in other ways That you do and you did And there's proof That we did wrong tonight

Could you sense a tragedy? Because I saw it on the BBC There's a panel on that channel

Could you walk a narrow line? I need to know I'll serve my time With some use

It's like I've never been born We conceive in the alleyways It's like I've never been born

We believe in other ways That you do and you did And there's proof That we did wrong tonight

And tonight You can cry if you want to But it won't help you

You can cry if you want to But it won't help you To get you through this crime It will plague you standby

It's like I've never been born We conceive in the alleyways It's like I've never been born

We believe in other ways That you do and you did And there's proof That we did wrong tonight

We did wrong, we did wrong
