

# Time Bomb

Sheena Easton

Maybe long ago there was a healthy respect?  
I've only ever known, wilful neglect  
With all eternity, there to borrow from  
We're always going to be here  
For tomorrow's sun

Now it's turning 'round  
Because there's really no choice  
When your money can't save you  
Love of the world  
Find it's voice

Ooh it's a time bomb  
Stops ticking and your time has gone  
Oh it's a time bomb

You talk so fast about how much you love me  
But I have to doubt, your sincerity  
Look around, see how far you've come  
By living blind to your own destruction

Look in the lake, see what it reflects  
This ain't love, no  
That's the face of easy sex

When my heart started beating  
I was on my own  
Now there's been a change in the weather  
Seems like we're all, in it together
