

There's a war in the day no peace at night  
There's blood on the hands of man yet we don't sympathize  
The meateater kills the cows they just depersonalize to justify  
Their own lust as the helpless die  
And its ironic how we cry for world peace but the violence won't  
Decrease unless our murders cease. So understand in the slaughter-  
house who's the beast and I demand that the innocent be released

Well I've tried the best I can. I've tried to understand  
Civilized man so-called civilized man  
Yes I've tried the best I can but who can understand civilized  
Man?

Guilt free so-  
called morality. Fallacy. The four food groups just  
Western medicine quackery  
(meat would be) \$35 a pound but our taxes subsidize as 35  
Starve as we gourmandize  
The grains that could feed the world go to their industry to  
Fatten up the cattle and I protest  
Rain forests once here kiss goodbye the biosphere ozone nightmare  
Just see the people don't even care

Well I've tried the best I can. I've tried to understand  
Civilized man so-called civilized man  
Yes I've tried the best I can but who can understand civilized  
Man?

Guilt free we overlooked the blood and brutality  
And the TV propaganda covers heinous reality  
A plea to the people of this land to do what they can with hope  
for a  
Civilized man

Well I've tried the best I can. I've tried to understand  
Civilized man so-called civilized man  
Yes I've tried the best I can but who can understand civilized  
Man?
