

# Make It Through

Sherwood

I know exactly where you are  
So I don't strain to see your light shine in the dark  
But I didn't know, the winter cold would leave us moving so slow  
And will summer bring the feeling back to our toes?  
Until it does can I just make it through?

Cause I don't know where I've gone wrong  
And I can't find where I belong without you  
Make it through  
Cause I don't know where I've gone wrong  
And I can't find where I belong without you

I'll weave the roads on every map  
Into a cord that wraps you up and pulls you back  
Cause I didn't know, the winter cold would leave us moving so slow  
And will summer bring the feeling back to our toes?  
Until it does can I just make it through?

Cause I don't know where I've gone wrong  
And I can't find where I belong without you  
Make it through  
Cause I don't know where I've gone wrong  
And I can't find where I belong  
Oh I can't find where I belong, without you
