Maybe That's Something

Sheryl Crow

We lay around just like gurus In borrowed robes And talk about nothing Well maybe that's something Maybe that's something

You stretch out across a long long table Without hesitation You say, "I'm willing and able"

Maybe that's something Maybe that's one thing more than I've seen Maybe that's something more than nothing

You say good, I say you should, will you be there? Making miracles is hard work Most people give up before they happen

Maybe that's something Maybe that's one thing more than I've seen Maybe that's something more than nothing

More than nothing, more than nothing

Maybe that's something Maybe that's one thing more than I've seen Maybe that's something more than nothing

More than nothing, more than nothing, more than nothing
