

There Is a Star That Shines Tonight

Sheryl Crow

There is a star that shines tonight, for all the world to see
So far away my lover is, please bring him home to me
The world is weary and unrest, to settle on us all
Tonight my Christmas wish will be, for all to heath the call

Peace on earth and in our hearts
That love ring out ring near and far
And lift the weary and the weak
Keep you near this Christmas Eve
There is a star that shines tonight

Once the angle did appear, to say be not afraid
But the angles watching over you, is the prayer that I will pray
And as we gather around the tree, and sing those Christmas songs
Will hear your voice above the fray, until your safely home

Peace on earth and in our hearts
That love ring out ring near and far
And lift the weary and the weak
Keep you near this Christmas Eve
There is a star that shines for you and me

And while we wait for freedoms bells, to ring throughout the world
The Christmas wish remains the same, of every boy and girl
That when that glorious sun does rise, and melt away their fears
That you'll be home this time to stay, and waiting by the tree

Peace on earth and in our hearts
That love ring out ring near and far
Oh lift the weary and the weak
Keep you near this Christmas Eve
There is a star oh there is a star that shines for you and me
