## Poison

## Shiny Toy Guns

I'm going to meet you

Voices are child in sound fades away For silence is walking Signs of you will leave

What will happen and now the same as you 'Til the end of someone's world And the cradle says goodbye to yesterday

Painfully, I prepare a release And poison takes me away Poison takes me away, takes me away

Listen, don't cry my child When you awake My father's table has set a place for you

Contact, with fire full love As you're to know my days A season of poison will bring the darkness soon

Painfully, I prepare a release And poison takes me away Poison takes me away On angel's wings, you learn to fly On angel's wings, you learn to fly

From this world you left below I'm going to meet you I've come to take you home Mommy, mommy, mommy

From this world you left below I'm going to meet you I've come to take you home

From this world you left below I'm going to meet you I've come to take you home

Painfully, I prepare a release And poison takes me away Poison takes me away On angel's wings, you learn to fly On angel's wings, you learn to fly
