

15 Million Light-Years Away

Shooter Jennings

Well I've tried, I've tried to get it right
Come close, a few times too
The lunatics roam the asylum
And animals roam the zoo
Criminal roam heroes, police straight the law
And velocifers are all flying out
They don't know nothing at all, no

One day we're gonna get ourselves together
Just when, I don't know, I can't shake on
It may be tomorrow, it may be today
Or 15 million light-years away
Or 15 million light-years away

The man who makes the rules,
Those are smiley ways
Lies to you once again
When riders roam, and roam is rided
The holy world is at its fear

One day we're gonna get ourselves together
Just when, I don't know, I can't shake on
It may be tomorrow, it may be today
Or 15 million light-years away
Or 15 million light-years away

The world ain't what it should be
In melody and derange
And god lord give the free will
To make the same mistakes again
Well I've tried, I've tried to get it right
Come close, a few times too
The is in their streams
Is one game making two
The lunatics roam the asylum
And animals roam the zoo

One day we're gonna get ourselves together
Just when, I don't know, I can't shake on
It may be tomorrow, it may be today
Or 15 million light-years away
Or 15 million light-years away.
