White Light

Shura

You're different
I like it
You're from another planet, huh?
I'd like you to take me there
You can fly your alien spaceship

You're different Don't hide it That's what made me notice you

There you were Sitting by yourself There you were Hey, hey, hey

You are a white light Stepping out of the dark You are a white light But you cover it up

Do you wanna fly me miles away And be alone, alone? Cuz I don't mind if we never go Never go home Stepping out of the dark

We're shoulder to shoulder Leaving for your universe And I can't control you (No I don't no I don't) Yeah, I can't control you

And there you are So self-contained There you are there

You are a white light Stepping out of the dark You are a white light But you cover it up

Do you wanna fly me miles away And be alone, alone? Cuz I don't mind if we never go Never go home Stepping out of the dark

You are a white light Stepping out of the dark You are a white light But you cover it up

Do you wanna fly me miles away And be alone, alone? Cuz I don't mind if we never go Never go home Stepping out of the dark Cuz I don't mind if we never go Don't mind if we never go Never go home
