

Well you've been watching what you think you like  
But I know what you don't  
You think it's all just playing, fun and games  
You're treating it like a joke

Some people say they wanna be me  
This life can be very deceiving  
It's just your state of mind  
Some people say they wanna be me  
This life can be very deceiving  
Things just come crashing down

You better watch what you say  
You might get what you're asking for one day  
Some people say they wanna be me  
This life can be very deceiving  
Things just come crashing down  
Where's your fucking backup now?

Well I've been looking and you're very wise  
You don't have what it takes  
You taste a little bit  
And you can't handle it  
Now you're about to break

Some people say they wanna be me  
This life can be very deceiving  
It's just your state of mind  
Some people say they wanna be me  
This life can be very deceiving  
Things just come crashing down

You better watch what you say  
You might get what you're asking for one day  
Some people say they wanna be me  
This life can be very deceiving  
Things just come crashing down  
But where's your fucking backup now?

You better watch what you say  
You might get what you're asking for one day  
Some people say they wanna be me  
This life can be very deceiving  
Things just come crashing down  
But where's your fucking backup now?
