

New life dawns - the inception of another link in a  
profound process  
Alteration and progress, nothing remains the same  
Like a from from the egg to the tadpole to the final  
stage  
Everything develops, learns, there's always reason almost  
rhyme!

Like a spirit staircase that someday, somehow will end  
Even the world's life cycle ends when progression's  
altered (synthetically)

I stalked the blissful fields of springtime, I comprehend  
and I remind  
And I will taste the bleary bleakness of autumn time, in  
due time I will find!

Genesis, search, consumation - no living thing is  
extempted  
Confined knowledge cannot understand - harmonious  
symbiosis!

Life cycles - almost everywhere!  
Life cycles - permanent progress!  
Life cycles - a higher contrivance...
