

## The More The Less

Sieges Even

Names of places  
Never heard about  
Number dimensions  
Naughts you've to count  
No currency  
No unit of weight  
A special unit back everyday  
5 million maybe 10  
Come juggle with the numbers again  
They won't get red  
That's the way it works I guess  
The more the less  
And if it's still too hard  
Add a naught  
This will make it easier-easier?  
While the decimal point moves to the right  
My conscience is getting clear  
Anonymous you are  
The high subtrahend  
Abstract number-concrete wonder  
You get to know the protection effect and realize that  
Abstract numbers ultrahigh  
The reason why  
We can be eye to eye  
Worrywart  
Add a naught  
Mind support  
You'll see it's easier-easier?  
If the five is an eight  
It won't burden my mind  
And history won't change  
Anonymous you are  
The high subtrahend  
Abstract number - concrete wonder
