

## War

### Sieges Even

Since the turn of time man has fought a thousand wars  
Acclamations welcome the outbreaks  
Cries attendings death's handshakes  
Shouldn't we have learned from history?  
This to me is just a myster  
Will storms of steel gathering again  
Or are there changes to prevent?  
Is there no chance to prevent; No chance?  
And some forget to say that human mind has got the ability to t  
ake a different way  
Natural occurence or fall of man?  
Maybe the revenge of a god called Pan  
Must storms of steel gathering again?  
Is there no chance to prevent?  
Thunderclouds deflower the innocent sky  
It starts blowing great guns  
"Natural Phenomenon" calling the warrior sons  
Regulation of overpopulation  
I'd like to nature  
The only nature man can't control  
When fights start: man again loses body and soul  
Don't say it's evolution  
We won't get absolution  
Man control your mind  
Thunderclouds won't blacken the blue sky
