

# Daylight Through The Nightlife

Sienna Skies

We stand and look at the moon  
We stand and look at the moon  
We both dont know, What will come out  
Are these feelings shared?  
Will they come flooding out?

We walk as we hold hands  
I look and you and ask to dance  
We hold each other tight, Gaze into your eyes  
The moonlight touches your skin  
And then daylight begins

The stars light up the night sky  
Staring and gazing  
Into your eyes the stars fade into shades of blue  
And then the sun will rise, It rises for you

The stars, Light up my world  
And then, The moon rises into the sky

ROCK! Here is my heart its yours  
Hold it safe and dear  
Cause now that you are holding it  
Without you I cant live  
I cant live

The stars light up the night sky  
Staring and gazing  
Into your eyes the stars fade into shades of blue  
And then the sun will rise, It rises for you

And then together  
We will stop the world  
As we wrap our arms around eachother  
And share a kiss  
As two lives have become one  
A feeling over rides  
As we wrap our arms around eachother and drift asleep tonight

Drift to sleep!
