

Pledge allegiance to your war
We never wanted any part of it
Undermining oil whore
Senseless death for government
Their streets are red
Their skies are black
And still we're fed

Your lies still choking on your lies
How do you use, and consume
Human life for profit
Your system fails us again
Tying your noose, as you mute
The voices of our children
Force fed the message that you send
Billions spent on spilling blood

While families are sleeping on the street
Welcome to America
This is the land of opportunity
Blind innocence
Their broken dreams
And still we're fed
Your lies still choking on your lies
We are not amused by your mistrust
And use of human life for your own gain
