

# On the Top of the World

Silent Fall

The road is long  
Obstacles you'll have to climb  
This voice inside your head  
Telling you to carry on  
Disillusion will be part of your days  
Despair may spread like a wildfire  
It's time to fight  
Climb the steps one by one  
To reach the goal of your life  
Get up again and walk on the straight line  
And one day you will be the number one  
Welcome to the story of life  
In this world you won't be spared  
You will have to keep standing  
And to face them without fear  
But your mind will be unfailing  
Because you have this will  
Just go forward and trust in you  
The goal is so close

Would you be the same  
If everything was easy  
You build yourself everyday  
Despite the ordeals on the path  
So never surrender  
And keep the fire going  
The maze has an exit  
That you will have to find

Never surrender, never forget  
The fire, burns in your veins

All the bad things in your life are now gone from your mind  
You are in this world on this day and we read in your eyes

That your work was not done in vain despite the scars on the road  
We'll always remain that you'll carry on, and until the end you  
will be the one
