

## Across the Night

Silverchair

Across the night  
It was the moon that stole my slumber  
Across the night  
I fell in love with people sleeping  
And hugged a man's arthritic shoulder

I fell tired, asleep in a golden ocean  
Your eyes perspired, a spike in my fascination

I don't mean to make you cry  
But this feeling will run right through the night  
And I'll only make you cry with these feelings

Sleepless, untamed without a leash on the light around me

So let us be married and have another baby  
Coz I don't wanna be lonely I just wanna be alone  
Yeh let's just get married shouting baby, baby, babies  
"You'll never sleep at all"  
But I don't wanna be lonely

Never seen the sunshine  
From higher points than sunrise  
I don't wanna be lonely  
I just wanna be alone
