Ready to Rock

Silverlane

We came out of darkness into the light
We keep on fulfilling the prophecy
Signs and miracles, divine orders showed us the way
For us to find each other on a misery day

We got the aura to enchant them We are the masters of the night

Get ready to rock

Come on and take that feeling and keep it alive

Get ready to rock

So many bad days we had to survive

Get ready to rock

Crowds are screaming, lights are shining bright

Get ready to rock

We are the gods of the holy night

Get ready to rock!

Look at our glory days, they will nver end Our crowd follows us around the world Braving hearts that is one thing you can see We altered our direction to a better path

We've changed your mind and made a new one We are the masters of the night
