

You Want It All

Silvertide

Standing there with that killer stare and a body that won't quit

She said I don't want a little piece of your love so give me all of it

And before I knew what I had to do she was holding on so tight
She said just relax babe kick on back and enjoy the ride

She wants more and more and more and more

You want it all, little girl, I hope you're ready

You want it all, well I get it, so babe come and get it

Come on, you want it all, up down all around straight down to the ground

You say you want it but your momma won't let it

You only live once so babe come and get it

Come on, babe, come and get it come on

Another night she's just arrived and she's knocking down my door

Wearin' nothing but a raincoat and she's begging me for more

Singing, I ain't seen a drop of rain in so long I just forget

And the minute that I'm close to you I'm soakin' wet

She wants more and more and more and more

You want it all, little girl, I hope you're ready

You want it all, well I get it, so babe come and get it

Come on, you want it all, up down all around straight down to the ground

You say you want it but your momma won't let it

You only live once so babe come and get it

Come on, babe, come and get it come on
