

# When We're Together

Simon Carly

"Hi," he says  
"Higher than the stars," he says  
And "I know I've seen you before," he says  
She looks up deep into his eyes and stares  
"Where were you into my life till now?"

I know that when we're together our hearts fall into line  
And I know why I'm afraid, this is my first time  
And the stars will be quiet while I sing you this song  
And I know I've been here before, and all day long

"Why," he says, "run away from faded prayers?"  
"Are you so scared that we might not get along?"  
Shy, she is, weary to speak of love  
And too tired to sleep, too tired to dream

I know that when we're together our hearts will fall in line  
And I know why you're afraid, this is your first time  
And our hearts will be quiet while I sing you this song  
And I know I've been here before, and all day long

Winter comes, brings with it its shortened days  
Leaves us less time in between deep nights  
And she stays because there's no time to wait  
And the morning stillness still leaves no time for the light

I know that when we're together our hearts will fall in line  
I know why we're afraid, this is our first time  
Our hearts will be quiet while I sing you this song  
And I know I've been here before, and all along  
I know I've been here before, and all along  
All day long, and all along. all along...
