Starlight

Simon Curtis

Do you remember the first time that you
Looked up into the night sky with me
I knew foreer I found that with you
When you're not around
All of my stars fall down

Back to when you wanted me, back to when you needed me
Starlight Starlight
Starlight Starlight

Back when all the stars were like
Diamonds shining in your eyes
Starlight Starlight
Starlight Starlight

Time that I took for granted I would
Move the sun and the planet if I could

Get you back in my orbit
With me
And if you come back down
I would move them all around

You left in the dark
You took my only spark

Back to when you wanted me
Back to when you needed me
Starlight Starlight
Starlight Starlight

Back when all the stars were like
Diamonds shining in your eyes
Starlight Starlight
Starlight Starlight

I wish I may I wish I might
Wish on the star I see tonight
I want you... I need you

Back to when you wanted me
Back to when you needed me
Starlight Starlight
Starlight Starlight

You left me in the dark
You took my only spark

Back to when you wanted me
Back to when you needed me
Starlight Starlight
Starlight Starlight

Back when the stars were like
Diamonds shining in your eyes
Starlight Starlight
Starlight Starlight

Diamonds shining in your eyes
When you're not around
All of my stars fall down
