Nothing Without You

Simon Webbe

How long we know one another? (hmm) First friends now lovers (yeah) Can you believe it took so long, so long? (girl) We kept the truth undercover (hmm) That we were perfect for each other (yeah) Can you believe it took so long, so long?

Look life is full of light and shade Sometimes it will get dark But that's the test to see how strong we are

And we could walk away I'm not giving up on us No, not today, baby You know I'm nothing without you with me Some arguments can escalate so easily, baby But I'm nothing without you

You You But I'm nothing without you

The first time that I saw ya (hmm) Your friend said don't bother (yeah) She thought that I would do you wrong, but no, no (girl) In a short time together (hmm) It couldn't get any better (yeah) I know I'll never do you wrong, no, no

Look life is full of light and shade Sometimes it will get dark But that's the test to see how strong we are

And we could walk away I'm not giving up on us No, not today, baby You know I'm nothing without you with me Some arguments can escalate so easily, baby But I'm nothing without you

You You But I'm nothing without you

Girl, you're everything I need You're the place that all roads lead You're the sweetest melody That just plays over like You You I won't walk away

I'm not giving up on us No, not today, baby You know I'm nothing without you with me (no, no) Some arguments can escalate so easily, baby (Yes they can) But I'm nothing without you You (oh) You You (oh, baby, baby, baby) But I'm nothing without you You (oh no) You But I'm nothing without you
