Careful In Career

Simple Minds

Careful in career Take care, I take care It's a shame to go away It's a shame to die already

Looking at you looking in through at me Pouring X years of life, pouring in ecstasy Performance or ecstasy

I'm looking at you looking in through at me I've come so far already I've come so far already So far, I've come so far

Careful in career Take care, I take care

I see the lodgers they are walking Hands over my eyes I see you yawning, shambling Drugged up by the heat and so

Looking at you, looking in through at me Pouring X years of life, pouring in ecstasy In performance or in ecstasy

I'm looking at you, looking in through at me I've come so far already I've come so far already

It's a shame Looking at you, looking in through at me All in ecstasy

I've come so far already All in ecstasy I've come so far already All in ecstasy

I've come so far already I've come so far I've come so far It's a shame, it's a shame Looking at you
